FOOD SERVICE

****NON-1.0 FTE****

If you work part-time, follow the instructions in the table below to determine the monthly amount that you have available to pay for medical coverage:

Please note that if your hours change during the year, your benefit FTE will update automatically and your deduction amount will change accordingly.	
Line #1 below:	<p>Multiply your average number of hours/day by how many days you are contracted to work/year. Food Service employees normally work 190 days per year (including holidays). Then divide that number by 1,440. This is your "Allocation Factor," it cannot be greater than 1.0.</p> <p>Example Calculation: 5 hrs per day X 190 days per year ÷ 1440 = .6597</p>
Line #2 below:	<p>Multiply the number on Line #1 by \$843.97, this year's monthly State Allocation. This is the monthly amount of State Allocation that you are entitled to based on your allocation factor.</p> <p>In the example above: 0.6597 x \$843.97 = \$556.77</p>
Line #3 below:	<p>The cost of mandatory benefits for Food Service employees is \$78.88 per month. Subtract this cost from your calculated State Allocation amount in Line #2. This is the monthly amount of allocation you have available for the cost of medical coverage.</p> <p>Review the total premiums for each plan below to see your cost of coverage.</p> <p>In the example above: \$556.77 - \$78.88 = \$477.89</p>

Line #1	Allocation Factor (1.0 Maximum)
Line #2	Available State Allocation Funds (Line #1 x \$843.97)
Line #3	Amount available for cost of medical coverage (Line #2 – cost of mandatory benefits from the chart below)
